I hope all is well. I want to make you aware that our jail population continues to rise, and is becoming a critical situation. Our population today is 1193, which is at an all-time high. The female population is at 263, which is requiring us to hold inmates in booking pending first appearance. This represents a significant increase over our situation a year ago as shown in the email below.

As you can see from the attached, updated charts the average population is continually rising, and does not appear to be a factor of an increase in intakes as evidenced by the yearly averages. Classification is preparing a list of potential candidates for pretrial release that we will send for judicial review by tomorrow. We would appreciate your assistance, and are available to meet to discuss effective solutions as soon as possible. Please feel free to call me to discuss and feel free to forward this email to anyone that you think can benefit from the info or help the situation. Thanks. Tommy
